1

Capture Player Data

Quickly capture your player's swings in real-time. Auto Capture allows you to capture motions continuously without interruption at your players own pace.

2

Analyze Player Motion

Utilize player's heat map analysis to quickly identify their swing faults. A Simplified color-coded analysis clearly shows your student areas needed for improvement.

3

Train Player Motion

Leverage real-time biofeedback to make lasting swing changes. The real time biofeedback screen enables players to simply match their body to the green target ranges in each box.
